

Export Binance CSV files and import them into Cointracking

In addition to the Binance API, we recommend importing the Binance CSV files to be able to close possible gaps.

Before importing the Binance CSV files, please make sure that the Binance API is linked. It is crucial that you import your CSV files only after you have set up the Binance API.

1. Navigate to https://cointracking.info/import/binance_general/

2 Click on "<https://www.binance.com/en/my/wallet/history/deposit-crypto>"

xxxxxxx-xxxx-xxxx-xxxxxxxxxxxx-xxxx].csv file or drag & drop it into this box.

3 Click on "Export Transaction Records"

The screenshot shows a top navigation bar with links: 'Earn', 'Finance', 'NFT', 'Institutional', a search icon, a yellow 'Deposit' button, 'Wallet', and 'Orders'. On the right are icons for a user profile, a notification bell with a red '30' badge, a document icon, a globe, and a moon icon. Below the navigation bar, the 'Export Transaction Records' link is highlighted with an orange circle. Further down, there are filters for 'Asset' (set to 'All') and 'Status' (set to 'All'), followed by a 'TxID' input field. At the bottom, a table header is visible with columns: 'Init wallet', 'Asset', 'Amount', 'Destination', 'TxID', and 'Status'.

4 Select "Customized" in the dropdown menu.

The screenshot shows a sidebar on the left with a 'Crypto' section containing 'Type' and 'Deposit' buttons. The 'Deposit' button is highlighted with an orange circle. Below it, the text 'Deposit hasn't' is visible. The main content area features a 'Time (UTC+0)' dropdown menu with options: 'Past 30 days (excluding today)', 'Past 7 days (excluding today)', 'Past 30 days (excluding today)' (highlighted with a yellow checkmark), 'Past 90 days (excluding today)', and 'Customized' (highlighted with an orange circle). To the right of the dropdown is a 'Coin' dropdown menu set to 'All'. Below these elements is a table with the following data:

Submission time	Date (UTC+0)	Status
2023-05-26 00:10:22	2023-02-25 - 2023-05-25	Expired
2023-05-24 14:43:23	2022-01-01 - 2023-01-01	Expired

- 5 Select the desired period (maximum 12 months) and click on "Continue".
