

# How to avoid unwanted transactions/re-imports via API and blockchain jobs

This guide explains how to set a start date to prevent unwanted transactions from being re-imported, and how to delete unwanted transactions that have already been imported.

Before making any major changes in your account we recommend creating a backup of your account. You can create a backup here: [cointracking.info/backup\\_trades.php](https://cointracking.info/backup_trades.php)

1

Navigate to <https://cointracking.info/import/balance/> and select the wallet address, which is responsible for importing the scam coin(s).

2

Click on "edit".

Import all your past and future transaction of your Ethereum address or wallet into your CoinTracking account.
