

How to avoid unwanted/scam tokens via Token Blacklist.

Here we explain how to add scam coins/tokens to the token blacklist and how to remove the scam coins.

Please note that the blacklist is only supported for the following blockchains

ADA, AETH, ALGO, ATOM, AVAX, BASE, BC, BSC, CRO, DOT, ELGD, ETH, LINEA, FTM, LUNA

Before making any major changes in your account we recommend creating a backup of your account.

You can create a backup here: cointracking.info/backup_trades.php

- 1 The fastest way to add coins/tokens to the blacklist is via the "Enter Coins" page.

Navigate to https://cointracking.info/enter_coins.php

- 2 Select the coin you want to add to the token blacklist.

<< You have more than 10,000 trades. We recommend to switch from CSP to SSP (Processing)

Alternatively, you can use the following method to add tokens to the blacklist:

9

Navigate to <https://cointracking.info/import/balance/> and select the wallet address that contains scam tokens. Then click on "Edit API".

10 Scroll to the bottom of the page and click on "New".

Import all ETH transactions & activate job

With a huge amount of transactions, the import process may take a few seconds.

Powered by Etherscan.io APIs

Token Blacklist

This blacklist can be used to skip specific coins based on their contract addresses. Please note that those coins will only be skipped for upcoming imports.

If you want to remove your current transactions, please follow these steps:

1. Add the contract addresses to the blacklist
2. Delete your transactions from the blockchain importing the scam coins via [Bulk Delete](#)
3. Set up a new import or rerun your current one

15 Click on "Delete transaction"

The screenshot displays a trading application interface. At the top, there are buttons for 'New', 'Edit', 'Duplicate', 'Delete', 'Bulk Edit/Delete', and 'Export'. Below these is a table of transactions with columns: Type, Buy, Cur., Sell, Cur., Exchange, Comment, and Date. The table contains several entries, including 'Deposit' and 'Trade' transactions. A dialog box titled 'Delete transaction' is overlaid on the table, asking 'Are you sure you wish to delete this transaction?'. The dialog has a close button (X) in the top right corner and a 'Delete transaction' button in the bottom right corner, which is highlighted with an orange circle. Below the table, there are options for 'Table View: Simple', 'Inline Editing: On', and 'Autocomplete: On'. A warning message states: 'CSP-Mode << You have more than 10,000 trades. We recommend to switch from CSP to SSP (Server-Side Processing)'. At the bottom, there is a section for 'Exchange Import' with logos for various exchanges: bitcoin, ABRA, ACX, ARI 109, AscendEX, ATANI, bako, Bibox, BINANCE, BINANCE.US, BingX, and BISON. On the right side of the interface, there is a list of cryptocurrency prices, including 3CRV, AAVE, ACT, ADA, ADAI, ADS, ADX, AETH, and others.
